

Healing Rays: The Light From a Distant Star

With Saadi Neil Douglas Klotz, Ph.D

Friday March 31 - Saturday April 1, 2017

9:30 - 17:00

Sufi Centre Den Haag

Anna Paulownastraat 78, 2518 BJ Den Haag

*"Light and life have their centre in the centre of every form,
but express themselves in the direction in which they spread....*

*Every atom of one's being, mental or physical, is radiant and throws its rays outward;
these are life itself and give life. All illness is lack of life; and it needs life to be cured."*

-- Hazrat Inayat Khan, from "Health"

This two day seminar will explore, with chant, walking meditation, meditation and movement, the active practices of Hazrat Inayat Khan and Murshid Samuel Lewis that promote health and healing at all levels of being. Hazrat Inayat Khan wrote extensively on health and healing, embodying his teaching in the Absent Healing Ritual. Murshid Samuel Lewis expanded on the healing work of Hazrat Inayat Khan through walking meditations, wasifa (mantra) and concentrations that promote healthy boundaries, release past impressions, and develop the self as a channel for healing.

We will also consider the heritage of classical Sufi healing that inspired both teachers, as well as parallels in the healing stories of Jesus. In addition, the seminar will include a number of Dances of Universal Peace and moving zikrs inspired by this work.

About Neil Douglas-Klotz (Saadi Shakur Chishti): He is a Murshid in the lineage of the Sufi Ruhaniat International and a Shafayat in the Dervish Healing Order. He is the co-founder of the International Network for the Dances of Universal Peace, and author of numerous books on Native Middle Eastern mysticism.
